Supplemental Regulations

WeatherTech Raceway LS – Event #2

May 21st – 23rd, 2021

Version 1

EVENT REGULATIONS	
Current Versions	<p>The following are the current Regulations for this Event:</p> <ul style="list-style-type: none"> 2021 General and Sporting Regulations (Version 21.2) 2021 Technical Summary Regulations – Porsche (Version 4.2) 2021 Technical Summary Regulations – Ferrari (Version 2.0) <p>Available on www.competentmotorsport.com website (2021 Season/ Regulations)</p>
Rule Amendments	<p>The sections listed below are rule amendments and/or additions to the current 2021 General and Sporting Regulations, and Technical Regulations. We have identified which rules are changes to the existing referenced section(s) or a new section(s) to be added.</p> <p>No Rule Amendments for WeatherTech Raceway Laguna Seca</p>
Sound Procedure Utilized for the Event	<p>Vehicles that hit or exceed 105db as measured by the WRLS sound monitoring equipment, will be black flagged and immediately removed from the track and cannot complete that session. The competitor is asked to modify the exhaust or sound issue on the vehicle. A 2nd sound violation follows the same procedure, a 3rd sound violation for the same vehicle excludes the competitor from the remainder of the weekend.</p>
Notifications	<p><u>Notice #1 – Liftgates:</u> For all events it is recommended that liftgates be in the closed position when not in use. When in use, place traffic cones around the parameter with a team member directing traffic as needed. All tractor trailers including the lift gate when open needs to be clear of fire lanes.</p> <p><u>Notice #2 – Technical Regulations Section 9.4</u> We would like to clarify the allowed usage of the recently available in car video systems, primarily using the latest V-Box hardware and cellular connections, in regard to this section of 9.4: <i>"Wireless (radio, IR, mobile device or any other method) transmission of telemetry data to or from the car is prohibited."</i> We are allowing the real time video transmission portion of this particular equipment as it is in line with our series stated intent to promote a learning/teaching environment, however the real time transmission of telemetry data is clearly not currently allowed per Section 9.4. This means that for all Qualifying and Race sessions, the connection from the car's can/option connector transmitting telemetry data to the video recorder (throttle, brake, etc..) must be disconnected if that video is also being transmitted live. During this season there will be continued discussion of the best response to this new technology for the future.</p>
